

A vibrant owl-themed board game designed for children to practice addition. The board features seven concentric paths, each with a different color and pattern. Each path segment contains a math problem or answer, and a small owl icon is placed at the start of each segment. The paths are: a blue path starting with $6+6$, a red path starting with $9+9$, a green path starting with $4+4$, a pink path starting with $3+3$, a yellow path starting with $4+4$, a purple path starting with $2+2$, and a light blue path starting with $5+5$. The paths lead to a central 'FINISH' circle. The board is set against a dark purple background with decorative owl illustrations.
